In accordance with Florida Statute 163.04, Energy devices based on renewable resources, a property owner may not be denied permission to install solar collectors..... such entities may determine a specific location where solar collectors may be installed on the roof within an orientation to the south or within 45 degrees east or west of due south, if such determination does not impair the effective operation of the solar collectors.

The installation company shall submit a design for Architectural Committee review depicting the location of all solar panels and related equipment, to include: height, width, color of panels and installation materials (brackets, wiring, any visible hardware) once installed. The design shall include the solar panel compass orientation. The installation shall consider the rear of each structure as the primary installation location of panels and minimize side locations to the rear of the structure limiting view from the street.
